Policy on Wireless Internet Access

Free wireless Internet access is available at the Dover Public Library. You don't need a plug or phone jack, just turn on your notebook/laptop computer or other wireless device and start surfing.

Requirements

You will need a notebook/laptop computer or other wireless device with 802.11a, 802.11b or 802.11g wireless networking.

If you are not sure if your notebook/laptop computer or other device has this functionality, please check with the manufacturer or supplier of your equipment. If your notebook/laptop computer or other device does not include wireless networking, you may be able to purchase a variety of external notebook/laptop pc cards and USB devices. The manufacturer or supplier of your equipment, or local technology merchants can help you

Limitations and Disclaimers

We have tried to make wireless access as available as possible in the library, but you may encounter some "dead" spots where wireless reception may be limited. If you have trouble accessing the Internet or staying online, please move closer to the library's Reference Room.

The wireless Internet access we offer is **unfiltered**. By choosing to use this free service, you agree to abide by the Dover Public Library's **Acceptable Use of the Library Policy**. This policy states the limitations of Internet access, your responsibilities for using that access, and provides examples of acceptable and unacceptable uses.

The Library 's wireless network is **not secure**. Information sent to and from your notebook/laptop computer or other wireless device may be captured by anyone else with a wireless device and the appropriate software.

Library staff is not able to provide technical assistance and no guarantee can be made that you will be able to make a wireless connection. Library staff will not handle, modify, or troubleshoot users' own equipment, but can provide general instructional handouts.

The Dover Public Library assumes no responsibility for the safety of equipment, nor for notebook/laptop (or other wireless device) configurations, security, or data files resulting from connection to the library's wireless network.
