

# At Home Creation Station

## Make a Mixed Media Collage

### You will need:

- \* piece of cardboard (from a recycled cereal or food box) or a paper plate
- \* glue stick, or glue, or tape
- \* any stuff that you want to use for your collage, for example: scraps of any kind of paper, scraps from magazines or newspapers, candy wrappers, stickers, material scraps, buttons, feathers, cotton balls, yarn, ribbon, leaves, etc.

### Directions:

Gather your materials together and arrange them on your cardboard. Try different arrangements and decide what you like best. Then glue your pieces to your cardboard. Collage, in its' simplest form, is the glueing of materials to a flat surface! There's no right or wrong way to do it! The examples below are all very different from each other. Have fun creating your own unique collage!
