STORMWATER & FLOOD RESILIENCE UTILITY CITY COUNCIL WORKSHOP

November 15, 2023

Deputy Mayor; Dennis Shanahan City Engineer; Ken Mavrogeorge, PE Stantec; David Hyder & Kelly Westover VHB; Bill Arcieri

City of Dover, NH

Stormwater Utility Development Process

Phase I: Evaluate Feasibility

Ad-Hoc Committee completes year-long Feasibility Study (January 2022)

Phase II: Develop Implementation Plan and Ordinance Determine Utility Structure, Fee, and Credit System (2023)

Phase III: Implementation
Utility System Roll-out (2024)

Stormwater Utility Development Process

Phase I: Evaluate Feasibility

Ad-Hoc Committee completes year-long Feasibility Study (January 2022)

Phase II: Develop Implementation Plan and Ordinance
Determine Utility Structure, Fee, and Credit System (2023)

Phase III: Implementation

Utility System Roll-out (2024)

Title X Chapter 149-I:6-c Criteria for Stormwater Utilities

The stormwater utility shall address flood and erosion control, water quality management, ecological preservation, and annual pollutant load contained in stormwater discharge.

- Utilities may collect reasonable fees that are directly related to the cost of providing services.
- II. Properties charged assessments shall have equal opportunity to receive **proportional benefit** from the utility.
- III. The utility shall offer **credits** or fee abatements based on on-site management of water quality impairment or peak runoff storage, or both. The utility shall adopt design standards to determine the amount of abatement.

- IV. In assessing fees, the stormwater utility district shall **forecast the annual cost** of each component in the district's stormwater management program. This forecast shall be the basis for annual assessments distributed equally among the number of fee units within the district.
- V. A minimum assessment may be established for fee units based on single family residences. This equivalent residential unit (ERU) can serve as the fee unit basis for all fees. Government property and non-profit organizations shall be subject to the fee structure.
- VI. Boundaries of the district are not required to coincide with municipal boundaries.

Source. 2008, 295:5, eff. Aug. 26, 2008.

Ad Hoc Committee (2020-2022)

Diverse committee with 17 members representing various interests:

- Business representatives
- Developers
- Residential property owners
- Commercial property owners
- Tax-exempt property owners
- Environmental groups
- City Councilors
- City staff
- Engineers & Attorneys

Funding Options Considered

AN EXPLORATORY PROCESS WITH NO PREDETERMINED OUTCOME

Funding Options

- General Fund
- Fee-based
- System Development Charges
- Stormwater Utility
- **Committee Homework Evaluation Criteria**
- Primary vs. supplemental
- SAFE criteria
- Advantages and disadvantages
- Concerns/Questions

- Sewer User Fees
- Village Districts
- Public-Private Partnerships
- Grants, Loans, and Bonds

Ad Hoc Committee Recommendations

UNANIMOUS SUPPORT for the recommendation of a stormwater and flood resilience utility

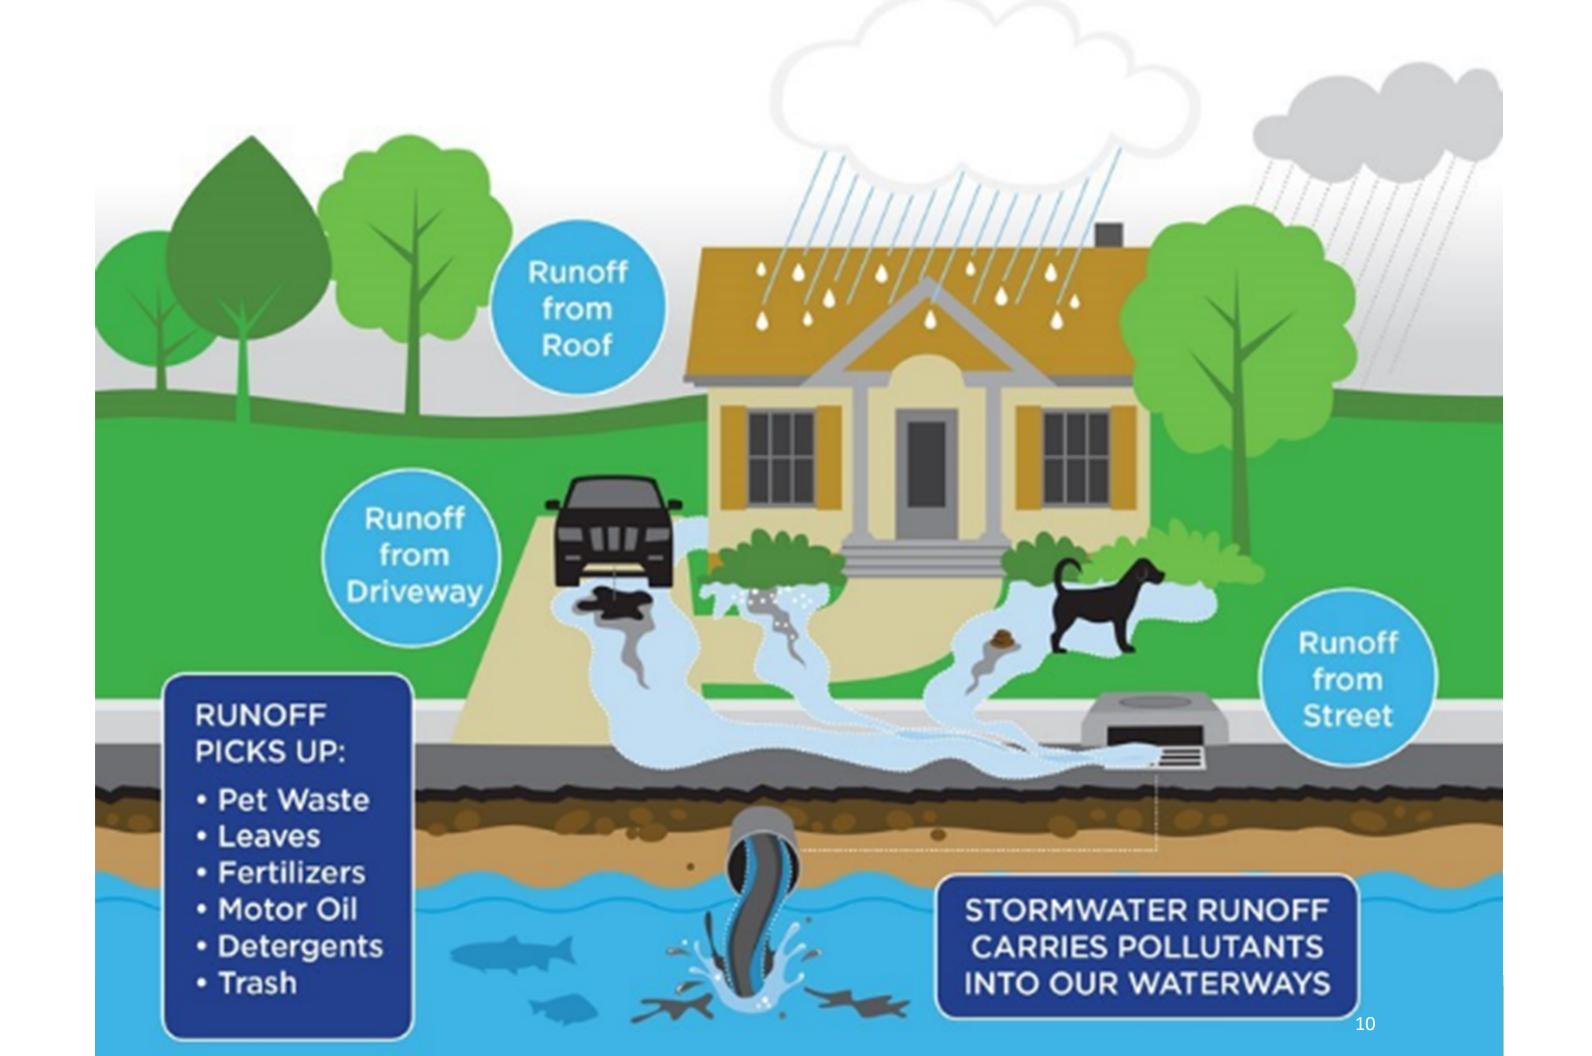

Stormwater Management (nh.gov)

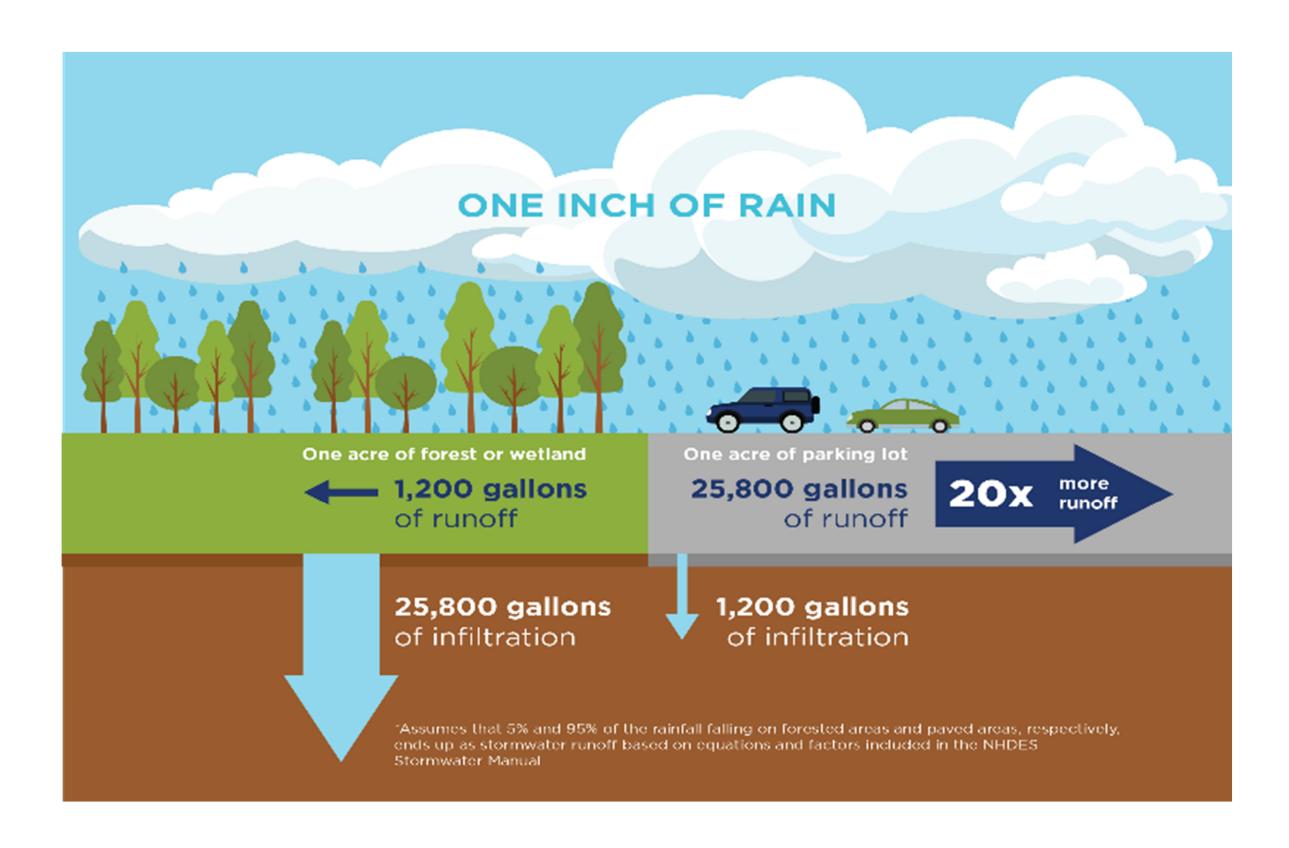

City Council Approval February 2, 2022: City Council voted 6-3 in favor of accepting the ad hoc Committee's recommendations

"The recommendation of the Committee is hereby accepted. The Council hereby states its intent to form a stormwater utility in the future, by way of..."

What is Stormwater?

More Impervious Cover = More Runoff

Increasing Flood Risks

Extreme Rain Events on the Rise

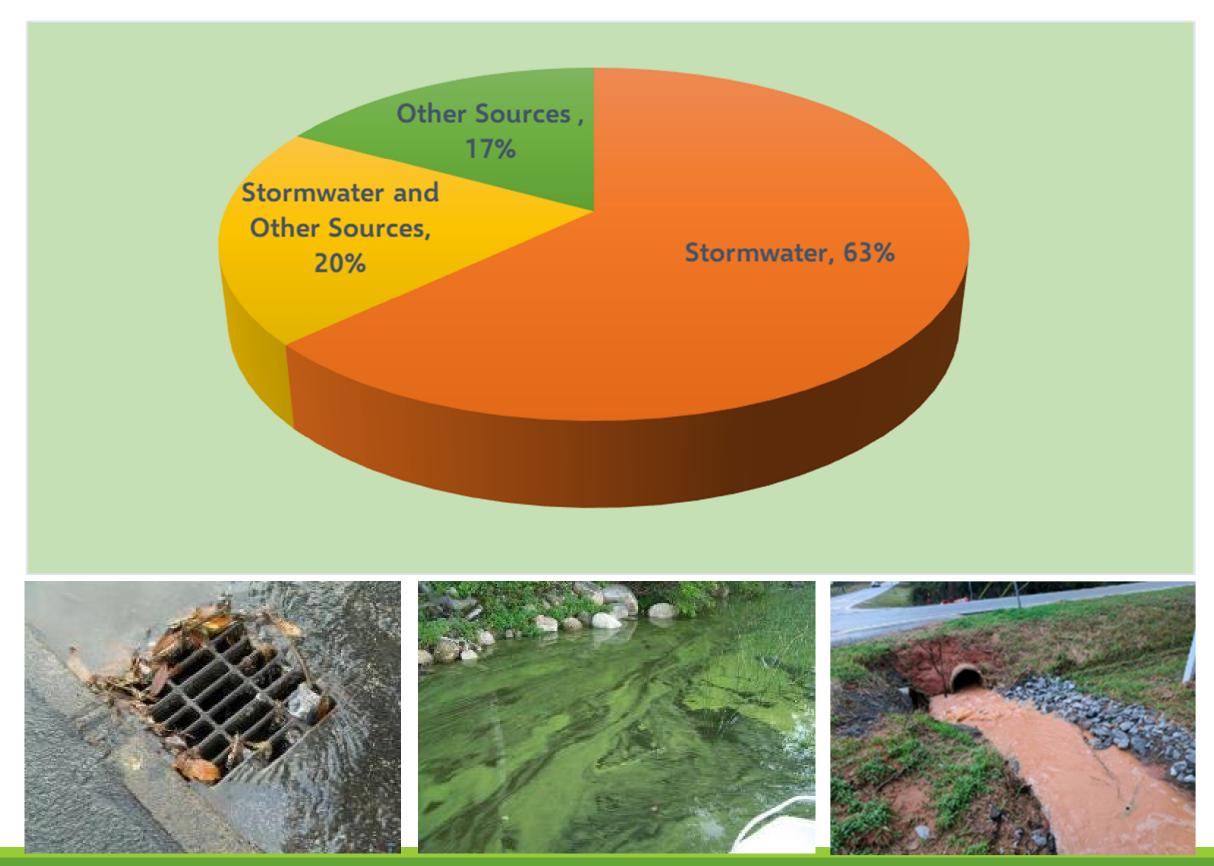

In last 3 months, at least 4 storms in NE with 6-9 inches of rain (> 100 yr. storm event)

Nearly \$80 million in property value and infrastructure in flood prone areas

Flood Mitigation Projects on hold

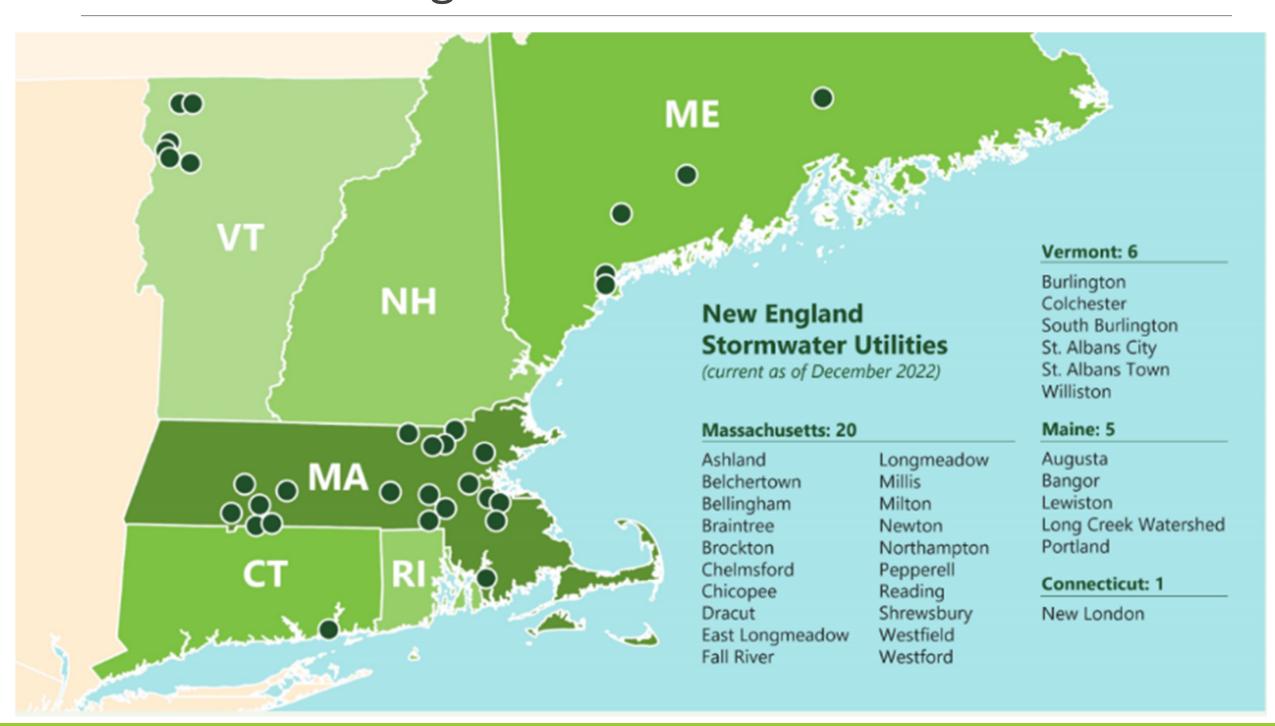

\$5 Million in flood resiliency projects identified to reduce future flooding

Water Quality Impairments in NH

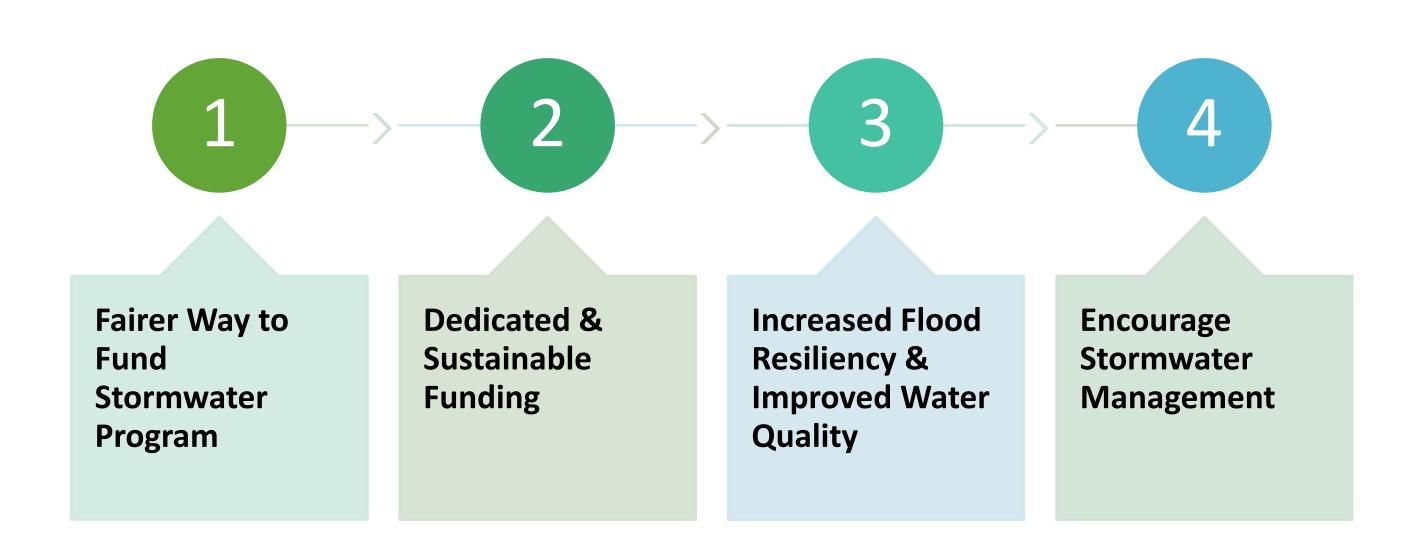

Source: NHDES data

Not a New Concept for <u>Funding Stormwater</u> Over 30 New England Stormwater Utilities

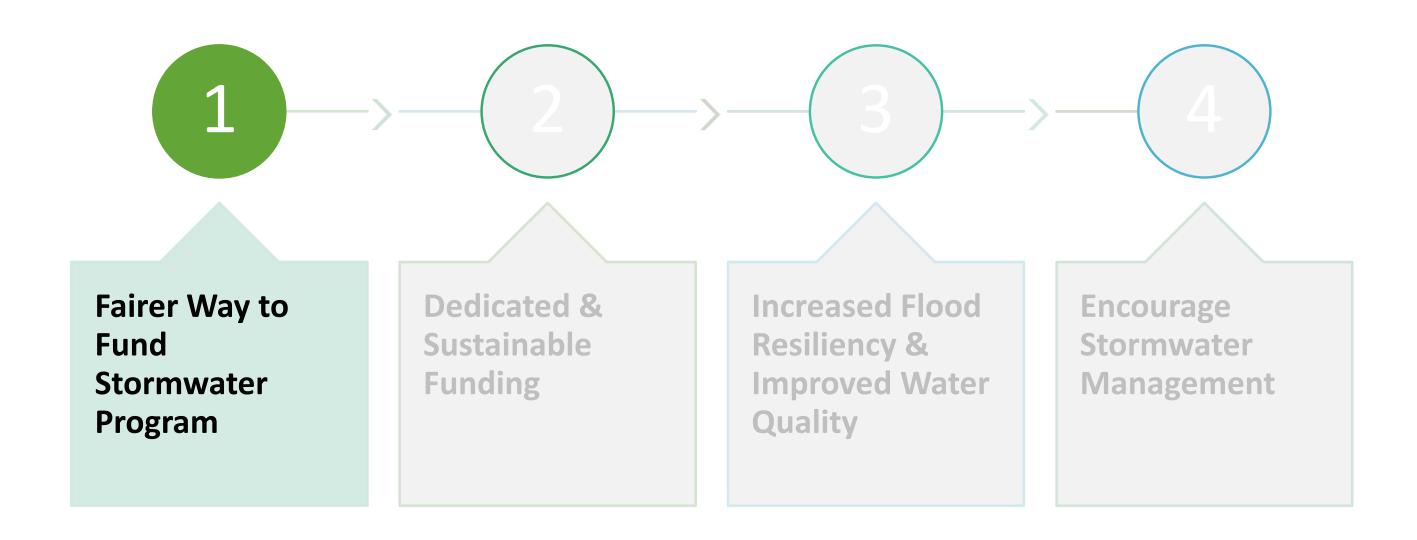

Benefits of a Stormwater Utility

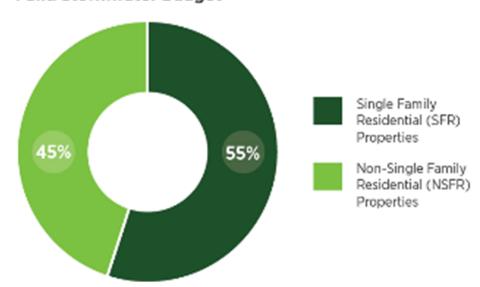

Key Reasons to Adopt a Utility Fee

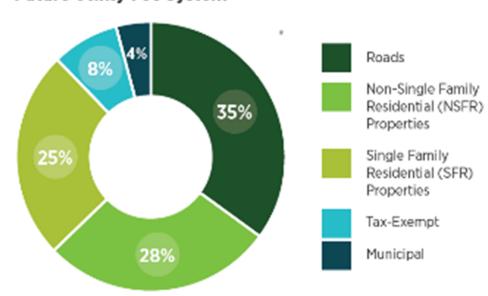

Key Reasons to Adopt a Utility Fee

Current Property Tax Contributions to Fund Stormwater Budget

Potential Revenue Contributions Under Future Utility Fee System

1

Fairer Way to Fund Stormwater Program

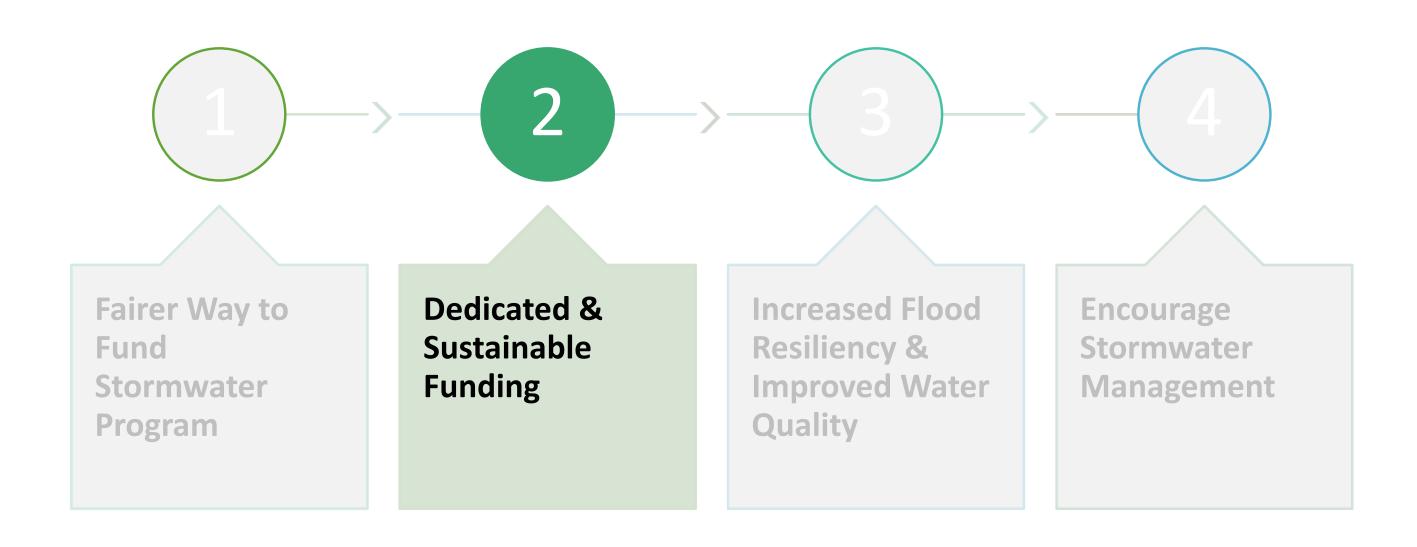

Current

 SFR property owners currently pay ~ 55% of the SW costs via property taxes but have only 25% of the Impervious Cover area

Proposed Utility

- SFR property owners would pay ~ 25% of SW costs
- More than 70% of the SW costs funded by commercial property and roads
- Tax-exempt properties would help to fund the Stormwater Program

Key Reasons to Adopt a Utility Fee

2 Dedicated & Sustainable Funding

Current Approach

Stormwater program competes for General Fund dollars, making longterm planning and proactive management of system very difficult

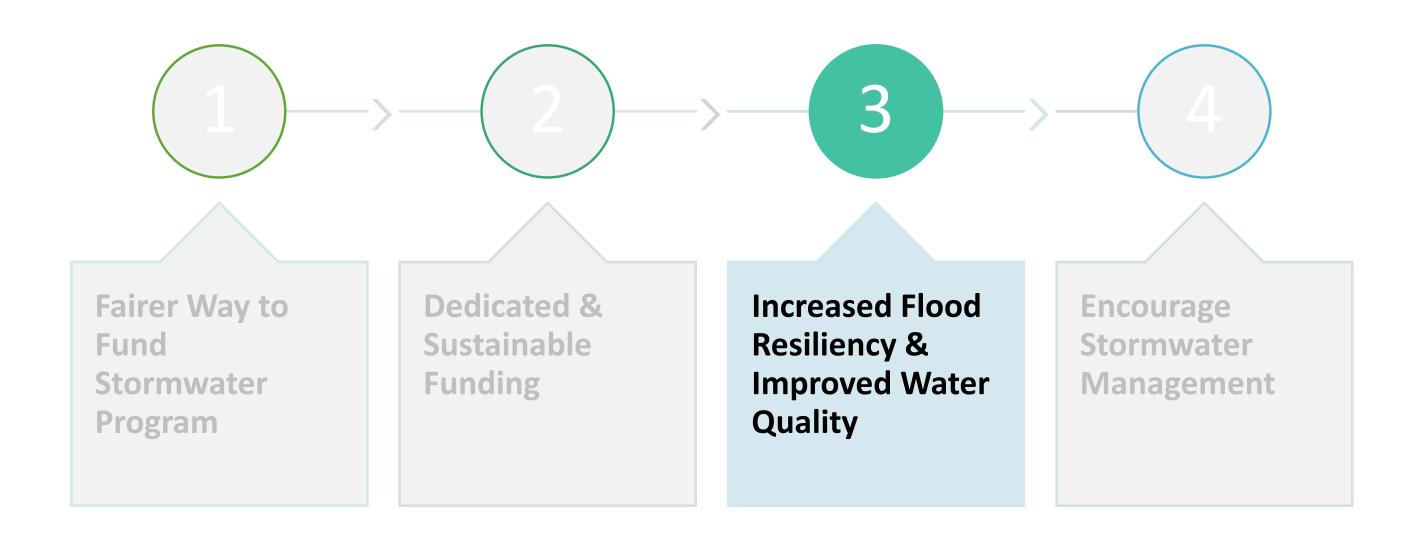

Popular Misconception

Stormwater Utility funds are used to pay for new programs or wish list of new projects.

Reality

- Funds are used to pay for current operations and infrastructure needs.
- Utility Funds can only be used for stormwater expenses.

Key Reasons to Adopt a Utility Fee

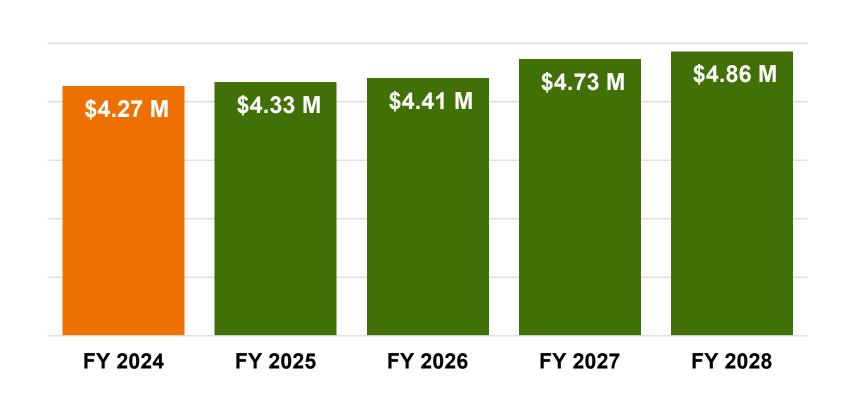

3

Increased Flood Resiliency & Improved Water Quality

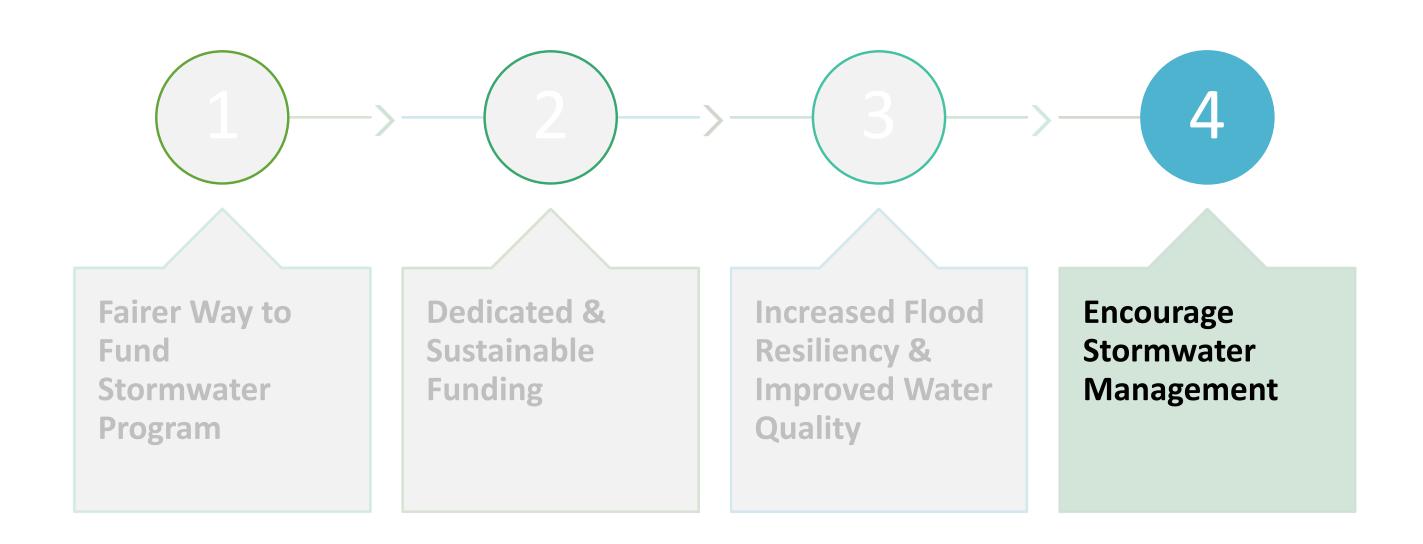

Expenditures include:

- Operating and maintaining stormwater system
- Capital investments to improve system
- Debt payments for prior capital projects

Total Annual Stormwater Expenditures

Key Reasons to Adopt a Utility Fee

4

Encourage Stormwater Management

• Stormwater Utility CREDIT able to reduce utility fees for qualifying onsite and/or offsite stormwater management measures.

New Hampshire Homeowner's Guide to Stormwater Management

DO IT-YOURSELF STORMWATER SOLUTIONS FOR YOUR HOME

- Credits for:
 - ✓ Infiltration
 - ✓ Rain gardens
 - ✓ Dry wells
 - ✓ Porous pavement
 - ✓ Nitrogen pledge
 - ✓ Stormwater BMPs
 - ✓ Public participation
 - ✓ Offsite stormwater management

Stormwater Utility Development Process

Phase I: Evaluate Feasibility

Ad-Hoc Committee completes year-long Feasibility Study (January 2022)

Phase II: Develop Implementation Plan and Ordinance Determine Utility Structure, Fee, and Credit System (2023)

Phase III: Implementation

Utility System Roll-out (2024)

Utility Development Process:

Impervious Cover Analysis

- 1) Quantify impervious cover on parcels and right of way
 - High resolution aerial imagery from NearMap.
- 2) Determine impervious cover by land use/property ownership
- 3) Determine an Equivalent Residential Unit (ERU)
 - Median amount of Impervious Cover on single-family properties
- 4) Determine ERUs/fee per property owner or water meter account

Impervious Cover Data Collection

NearMap Aerial Imagery

 Impervious cover data has greater resolution than the GRANIT data

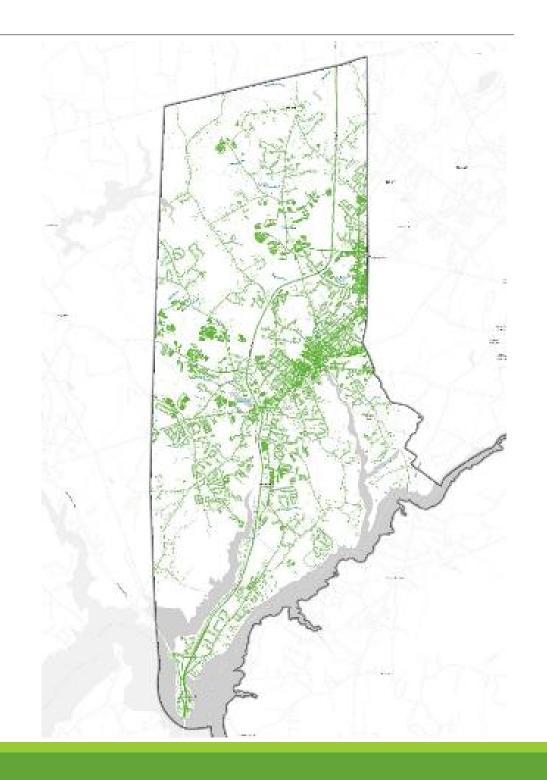

Two data sources:

- Light green = GRANIT 2021 data
- Dark green = NearMap 2022 data

Impervious Cover Results

Impervious Cover (not including right-of-way) 67,415,262 sq. ft.

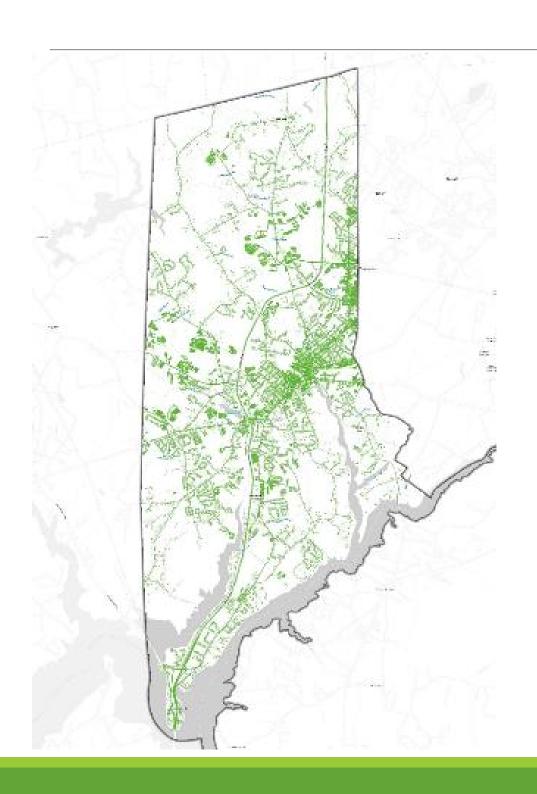

Impervious Cover* By Land Use

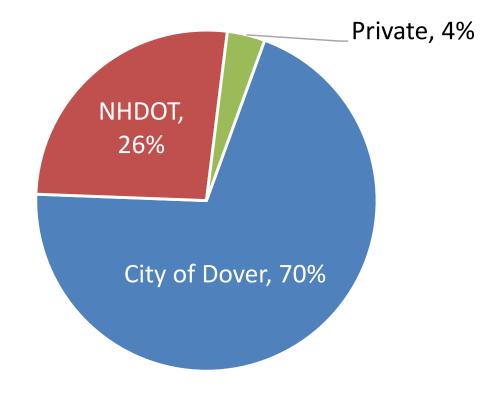

Land Use Type	IC Area (sq. ft.)	% Total
Commercial/Industrial/Utility	28,306,333	42%
Residential	26,328,739	39%
Non-Govt. Tax Exempt	7,873,490	12%
City-Owned	3,552,041	5%
County	772,623	1%
State & Federal	582,037	1%
Parcel Total (no ROW)	67,415,262	100%

^{*}Not including right of ways

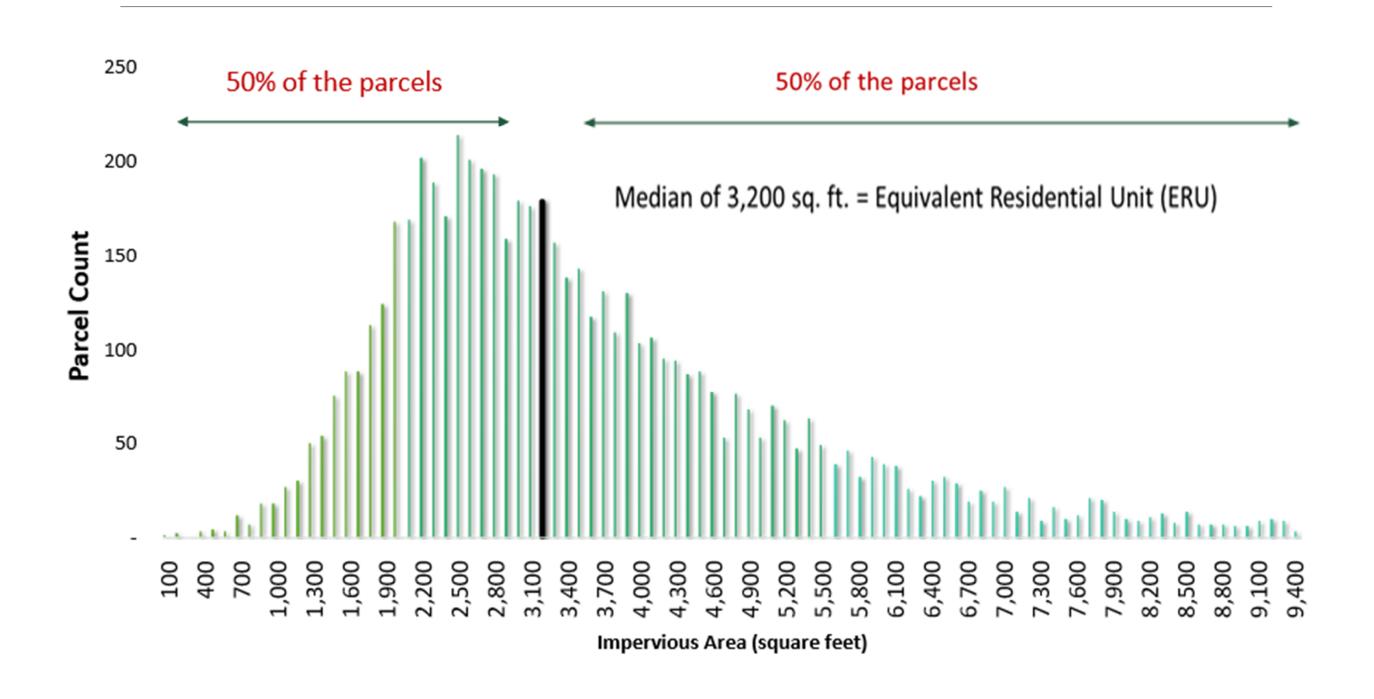

Impervious Cover Results

Right-of-way Impervious Cover **34,171,051 sq. ft.**

Determination of an ERU for SFH Properties

Utility Development Process:

Financial Analysis

- 1) Existing stormwater department operating expenses
- 2) Additional allocated utility costs associated with:
 - 25% of expenditures within FY24 Budget within Community Services Engineering Division
 - Estimate of staffing needs to manage administrative aspects of a stormwater utility
 - Municipal Alliance Adaptive Management contribution
 - Street Sweeping initial estimate
- 3) Existing debt for prior stormwater capital investments
- 4) Capital project expenditure plan (FY24- FY 29) + unissued authorized funding
 - Portion of street reconstruction projects
 - 50% of General Permit Compliance

Financial Analysis Assumptions

CIP escalated at 3% annually beginning in FY 2025

Capital plan funded with debt issuance 4.75% interest rate over 20 years

Baseline - Assume no growth in impervious area

Gradually fund reserve over 6 years (Target 15% of annual appropriation)

General Fund Impact

Stormwater Expenses funded by General Fund (FY24): \$3,995,226

City of Dover Stormwater Charge*: \$1,379,731**

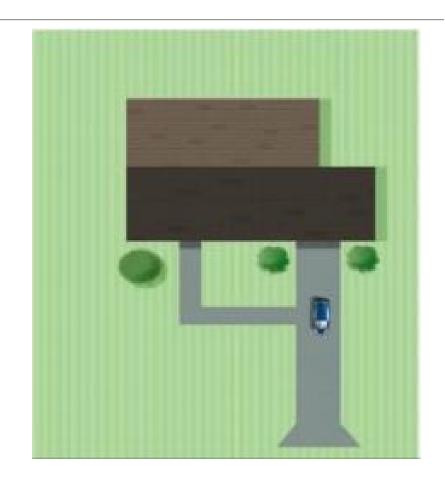

Net Reduction in General Fund: \$2,615,495

*Annual amount City would be responsible for from General Fund. Includes fees for municipally owned city roads and buildings (27,471,776 square feet of impervious cover) in addition to the City of Dover's share of Strafford County's Stormwater Fees (33% of \$38,593)

^{**}Does not include reduction in fees from stormwater credits.

How would a stormwater fee work?

- Property owners would fund the stormwater system based on amount of potential runoff from their property
- Potential runoff is based on impervious cover on property
- Median single-family property in Dover has 3,200 square feet of impervious cover
- 1 Equivalent Residential Unit: ERU

Impervious Cover

Roof: 1,700 sq. ft. Walkway: 300 sq. ft. Driveway: 1,200 sq. ft.

Total: 3,200 sq. ft. = 1 ERU

How would a stormwater fee work?

 Property owners with more impervious cover would pay more to fund the stormwater system

Impervious Cover

Roof: 22,000 sq. ft. Parking Lot: 10,000 sq. ft.

Total: 32,000 sq. ft. = 10 ERUs

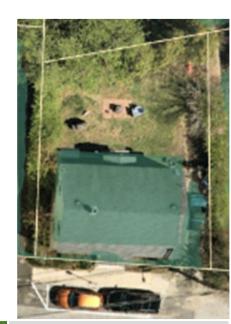

Stormwater Fee Structure

Impervious Cover (sq. ft.)	ERUs	Monthly Fee	Annual Fee**
400 - 1,600	0.5	\$6.66	\$80
1,601 - 4,800	1.0	\$13.32	\$160
4,801 - 8,000	2.0	\$26.65	\$320
8,000 - 11,200	3.0	\$39.97	\$480
Over 11,200	Per 3,200 sq. ft.*	\$13.32	\$160

^{*}Rounded up to nearest whole ERU

^{**} Does not include credits

Example Single-Family Properties

Impervious Cover (sq. ft.)	1,332
ERUs	0.5
Annual Stormwater Fee	\$80

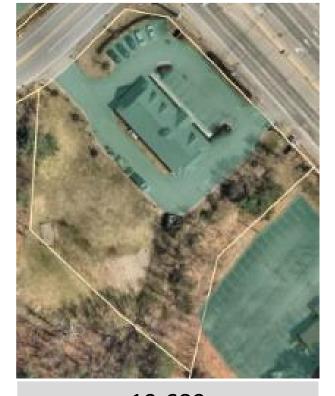

Example Commercial Properties

Impervious Cover (sq. ft.)	10,658
ERUs	3
Annual Stormwater Fee	\$480

19,689	
7	
\$1,120	

Example Industrial Properties

Impervious Cover (sq. ft.)	111,390
ERUs	35
Annual Stormwater Fee	\$5,600

HOA Example

39 units within Community

Impervious Cover = 129,783 sf

Number of ERUs: (129,783 / 3,200) = 41 ERUs

Annual Total Community Stormwater Bill: \$6,553

Divided per Unit: SW Bill = \$168/year without credits

Property Tax vs. Stormwater Fee

Single Family Property	ERUs	Property Assessment	Fully Fund \$4.5M with Property Taxes	Funded With Stormwater Fee**	Property Tax Portion	Total	Net Change
Property A	1	\$300,000	\$234	\$160	\$69	\$229	(\$5)
Property B*	1	\$460,000	\$359	\$160	\$106	\$266	(\$93)
Property C	1	\$600,000	\$468	\$160	\$138	\$298	(\$170)

^{*}Average residential property assessment is \$458,334

Credits

Stormwater Utility CREDIT

- Users can apply for credits to reduce their stormwater utility fee
- Fee available for qualifying onsite and/or offsite stormwater management measures.
- Credits capped at 50% of fee for management of stormwater generated on site
- Credits can exceed 50% if offsite stormwater is managed

- SFR Property with 3200 sf of impervious cover and \$460,000 assessment
- Annual Stormwater Fee: \$160
- Owner takes advantage of the following credits:
 - Nitrogen Pledge
 - Driveway Infiltration Trench

Credit Type	Resources and Guidelines	Credit Amount
Dripline Infiltration Trench		
Driveway Infiltration Trench Dry Well Porous Pavement, Patio, Walkway Intensity of Development	Stormwater Credit Manual and the NHDES Soak Up the Rain Program for guidance.	Up to 25% credit for Impervious Area Managed per credit type
Rain Garden		
Vegetative Buffer Public Participation	Stormwater Credit Manual and/or the NHDES Soak Up the Rain Program for guidance.	10% credit per credit type
Manage Offsite Stormwater	Must own and maintain a stormwater facility that is fully functioning as designed and permitted that meets local design standards and regulations.	Up to 50% credit for management of offsite impervious area equivalent to or exceeding onsite impervious area
Nitrogen Pledge	Pledge to not use lawn fertilizer or to only use slow- release organic nitrogen.	5% credit during the year of pledge

- Owner takes advantage of the following credits:
 - Nitrogen Pledge (5%)
 - 5% credit x \$160 = \$8

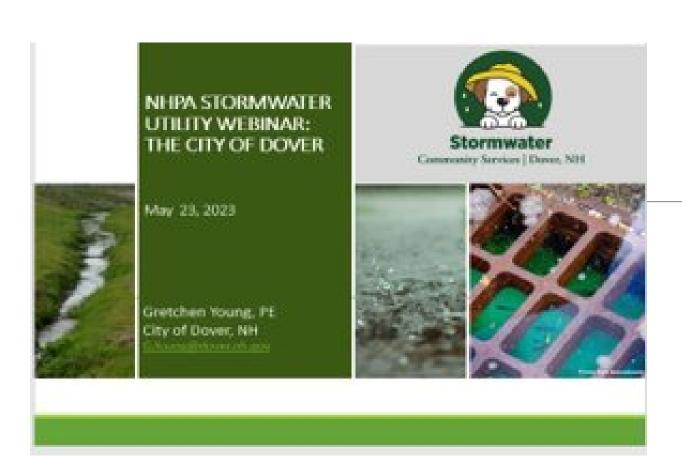

Credit Type	Resources and Guidelines	Credit Amount
Dripline Infiltration Trench		
Driveway Infiltration Trench Dry Well Porous Pavement, Patio, Walkway Intensity of Development Rain Garden	Stormwater Credit Manual and the NHDES Soak Up the Rain Program for guidance.	Up to 25% credit for Impervious Area Managed per credit type
Vegetative Buffer Public Participation	Stormwater Credit Manual and/or the NHDES Soak Up the Rain Program for guidance.	10% credit per credit type
Manage Offsite Stormwater	Must own and maintain a stormwater facility that is fully functioning as designed and permitted that meets local design standards and regulations.	Up to 50% credit for management of offsite impervious area equivalent to or exceeding onsite impervious area
Nitrogen Pledge	Pledge to not use lawn fertilizer or to only use slow- release organic nitrogen.	5% credit during the year of pledge

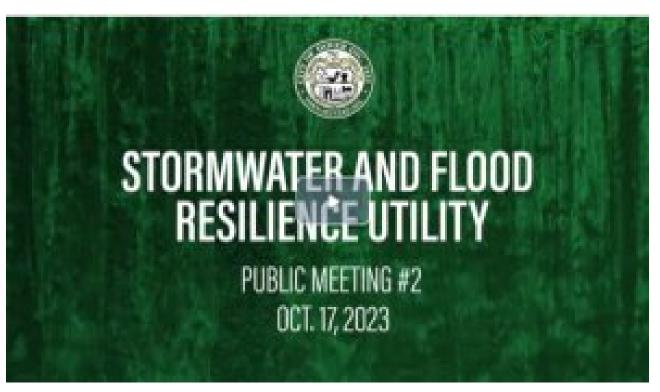

- Owner takes advantage of the following credits:
 - Driveway Infiltration
 Trench for 1000 sf
 - (1000 sf/3200 sf) = 31.25%
 of total IC treated
 - 31.25% x \$160 x 25%
 credit = \$12.50 savings
 annually or 7.8% of fee.

Credit Type	Resources and Guidelines	Credit Amount
Dripline Infiltration Trench		
Driveway Infiltration Trench Dry Well Porous Pavement, Patio, Walkway Intensity of Development Rain Garden	Stormwater Credit Manual and the NHDES Soak Up the Rain Program for guidance.	Up to 25% credit for Impervious Area Managed per credit type
Vegetative Buffer Public Participation	Stormwater Credit Manual and/or the NHDES Soak Up the Rain Program for guidance.	10% credit per credit type
Manage Offsite Stormwater	Must own and maintain a stormwater facility that is fully functioning as designed and permitted that meets local design standards and regulations.	Up to 50% credit for management of offsite impervious area equivalent to or exceeding onsite impervious area
Nitrogen Pledge	Pledge to not use lawn fertilizer or to only use slow- release organic nitrogen.	5% credit during the year of pledge

- Credits Obtained
 - Driveway Infiltration
 Trench for 1000 sf =
 \$12.50 savings
 - Nitrogen Pledge = \$8
 - \$12.50 + \$8 = \$20.50 or 12.8% of fee
 - Stormwater Fee:\$160 \$20.50 = \$139.50
