

WATER SUPPLY IMPROVEMENT

0651010-05

Water Service Line Replacement

Dover Water Department
Dover, NH

Loan Amount \$5,940,000

Funds Provided by

The Drinking Water State Revolving Fund

Construction of upgrades and improvements to the Drinking Water Distribution System, in Dover, New Hampshire were financed by the Drinking Water State Revolving Fund (DWSRF).

This project will identify all water service line materials and replace all lead or galvanized requiring replacement (GRR) water service lines in the distribution system. It will provide water quality benefits through the removal of lead and/or galvanized materials in the water distribution system for community residents and businesses in or near the City of Dover.

The DWSRF program is administered by the NH Department of Environmental Services with joint funding from the Environmental Protection Agency. DWSRF programs operate around the country to provide states and communities with the resources necessary to maintain and improve the infrastructure that protects our valuable water resources nation-wide.
