Master Plan 101

A Master Plan
- Is a set of statements about land use and development principles for the municipality with accompanying maps, diagrams, charts and descriptions to give legal standing to the implementation of ordinance and other measures of the Planning Board.
- Should lay out a physical plan which takes into account social and economic values describing how, why, when and where the community should build, rebuild and preserve.
Master Plan Cycle

Amendment → Data Collection → Data Analysis → Community Vision → Select Preferred Alternative → Alternative Evaluation → Implementation → Monitor → Amendment

Master Plan Do’s and Don’ts

Do think of the Master Plan as:
- The community’s vision
- A living/dynamic document
- A tool for community growth
- A guide for capital investment

Don’t think of the Master Plan as:
- Regulations
- A static document
- Funding
- A burden
Master Plan/CIP Connection

Communities need to review key portions of the Master Plan for indicators of long-term capital needs which improve existing services to meet community standards and accommodate a reasonable share of future growth. Strategic capital investments may be identified which further the goals of the land use plan and the economic development objectives of the community.
Zoning Ordinances are the principal planning tool that communities use to manage the many land uses within its borders. Communities can determine the process of the adoption of zoning regulations.

Why Have a Zoning Ordinance?
Ordinances are designed to promote the health, safety and general welfare including the prevention of the overcrowding of land and congestion of streets.
