

1999 Survey done by James W. Sewell Surveyors of Old Town Maine

This survey was done because the owner at the time wanted to put in an 9 holes golf course. The sketches that you see over the survey show that this could have been done. Apparently 9 holes would have fit. But this never happened, and the east side of the valley was sold separately to Konovo Proverties and a Home Depot was Built in 2003.
