Circle Art

You will need:

- * a piece of paper
- * pens, pencils, crayons, markers
- * circle shapes to trace (any jar lids, coffee can lids, rolls of duct tape, masking tape, paper cups, or other circle shapes will work)

Directions:

1. Trace circle shapes with a pen or marker. You can trace the same circle shape over and over for your project or trace different size circles. To add interest, overlap circles. You can make as many or as few as you'd like in this circle project.
2. Now it's time to color with crayons, markers, colored pencils, or paint. You can use as many or as few colors as you like, create patterns, stay in circles, or color outside of them. There's no right or wrong way to color your circle art! Just have fun!
