Cupcake Liner Fish

Supplies needed:

- 1 sheet of blue (or any other color) paper
- cupcake liners (can use a variety of standard and mini size)
- glue stick
- wiggly eyes
- markers or crayons
- white binder reinforcement stick-on labels (optional)

Directions:

1. You will need two cupcake liners for each fish. Use one cupcake liner for the fish body. Cut your other cupcake liner in half and then cut one of those pieces in half again. Use one of those quarter pieces for your back tail fin. For the side tail fin, cut the triangle tip off the other quarter piece of cupcake liner. You might want to trim a little off the side, too. Glue all of the pieces together on your blue paper to make your fish.
2. Glue a wiggly eye on each fish and use a marker or crayon to draw a mouth on each fish. If you have white reinforcement labels, peel and stick them around your fish to look like fish bubbles, or draw bubbles.
3. Use your crayons or markers to draw water squiggles on your paper and any other details to you'd like to add to your fish scene. Have fun!
