

At Home Creation Station – SRP 2020 – Week 4

Paper Plate Swan

Supplies needed:

- paper plate
- scissors and glue
- 1 small piece of orange paper or an orange marker
- 1 googly eye or a black marker

Directions:

1. Start by cutting a D shape out of the middle part of the plate. Cut straight through the middle all the way over until you get to the textured part. Then you will follow the line around the plate until you get back to the beginning, leaving the textured edge of the plate for the neck and head. (Keep that extra piece you cut out!) Make the head for your swan by cutting an inch or two off the end of the textured neck and then round the edge to form the face of your swan.
2. Now, cut a triangle beak out of orange (or any color) paper and glue it to the swan's head. Glue on a googly eye or draw an eye with a black marker.
3. You can cut a wing out of the scrap from the middle of the plate and glue it to your swan. Have fun!
