

JBC Monthly Status Report – February 2017

DHS–CTC Building Project

- There was only one DHS JBC meeting in February due to the rescheduling of one meeting four times due to inclement weather.
- The end date of the project is still the same, but some items have been re-sequenced due to a shortage of manpower in some trade areas.
- The communications department of PC Construction will contact Mike Gillis regarding guidelines for videoing and photographing the project as it progresses. The goal is to keep the public informed on the process and create a history of the project.
